Detail-oriented recent graduate skilled in front-end and back-end web development, specializing in building responsive applications and integrating RESTful APIs, seeking to deliver innovative solutions as a Full-Stack Web Developer

Education	
STI College Balagtas Bachelor of Science in Information Technology Thesis: Barangay Management Information System for Efficient and Effective Governance on Barangay Primero Borol 1st Awards: President's Dean Lister (2021-2023)	Balagtas, Bulacan June 27, 2025

Experience	
Organization: Odecci Solutions Inc. Position Title: Front-End Developer & Integration Engineer (Internship) - Designed and implemented responsive UI/UX for Odecci's CRM system using Laravel and Blade, ensuring a consistent user experience across desktop and mobile. - Integrated RESTful APIs to enable seamless data flow between front-end views and back-end services. - Collaborated with a 4-member development team across the full SDLC, from feature implementation and code review to deployment. - Conducted manual and functional testing, resolving UI and data-handling issues to improve system performance prior to release. - Built an interactive, HTML-based marketing email to promote Odecci's school website services, aligned with the company's branding. - Developed an HTML and SCSS quotation template used to generate professional client quotes, including service breakdowns, rates, and payment details. - Led the first front-end development phase of an Employee Management System (EMS), implementing the employee profile dashboard, task list, schedules, and notes interface.	Guiguinto, Bulacan January 2025 – May 2025
Organization: Self-Employed Position Title: Freelance Full Stack Developer - Completed multiple web development projects involving front-end and back-end implementation using Laravel and MS SQL - Designed and developed responsive user interfaces with HTML, CSS, and JavaScript for academic-related applications - Developed back-end APIs and managed databases using Laravel framework and MS SQL for dynamic data handling - Coordinated project requirements and delivery timelines with university student clients, ensuring timely delivery of functional solutions - Built a local government information management system featuring secure admin controls, real-time data visualization, communication tools, and service transaction tracking (project details under NDA)	Remote Work 2024-Present

Activities & Involvement	
Organization: Microsoft and LinkedIn Title of Qualification Awarded: Career Essentials in Software Development	Remote 2025
Organization: MongoDB University Title of Qualification Awarded: MongoDB Node.JS Developer Path	School 2025
Organization: Asean Foundation with Collaboration of AI Ready ASEAN and Google.org Title of Qualification Awarded: Certificate of Completion – AI Learning Modules	Remote 2025
Organization: APAC Cybersecurity Fund – The Asia Foundation Title of Qualification Awarded: Certificate of Completion – Cyber Hygiene Training	Remote 2025
Organization: STI COLLEGE BALAGTAS Title of Qualification Awarded: Certificate of Completion – SAP BUSINESS ONE, SAP ADVANCE	School 2024
Organization: STI COLLEGE BALAGTAS Title of Qualification Awarded: Mobile App Hackathon (1st Runner Up – UI/UX)	School 2024

Organization: iSite Inc.	Remote
Title of Qualification Awarded: National IT Skills Competition Participation – Python	2024
Organization: STI COLLEGE BALAGTAS	School
Title of Qualification Awarded: Codefest (1st Runner Up)	2024

Skills & Interests

- Technical:**
- Front-End: HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap, Livewire, Sass/SCSS
 - Back-End: PHP (Laravel), MySQL, MSSQL, MongoDB
 - Integration: RESTful APIs, Twilio
 - Tools: Git, CI/CD workflows
 - Project Management: Agile (Scrum)
- Design & Tools:**
- Adobe Photoshop, Adobe Illustrator, Figma
- Development Practices:**
- Responsive UI/UX design
 - Modular component architecture
 - Cross-platform optimization

Highlighted Projects

- TypoGuard Real-time weather, Live tides, and dam monitoring platform**
1. Designed and launched a fully responsive web application using Laravel 11 and Tailwind CSS, delivering real-time, multi-source monitoring for weather, tides, and dam levels across the Philippines.
 2. Engineered dynamic geolocation search and interactive UI/UX; automated live updates using exclusively open-source APIs (PAG-ASA, Tomorrow.io, WeatherAPI) for location-based forecast and tide data.
 3. Built robust backend connectivity, smart search fallbacks, and scalable architecture supporting disaster preparedness and public safety on both desktop and mobile platforms.
- Barangay Management Information System for Efficient and Effective Governance on Barangay Primero Borol 1st**
1. Developed a local government information management system featuring secure administrator controls, comprehensive resident data management, real-time demographic and jurisdictional visualization, automated permits issuance, integrated SMS communication platform, transaction tracking, complaint monitoring, interactive mapping for disaster response, and robust audit logging; collaborated closely with local government staff to tailor practical solutions (project under NDA).
- Odecci Solutions Inc. (Internship Projects)**
1. **Full Front-End Ownership CRM** – Spearheaded the front-end development of a modular, responsive CRM using the TALL stack; delivered dashboards, contact and deal management, dynamic forms with custom fields, RBAC and secure authentication, and collaborated on CI/CD, GitHub workflows, and API integration for leads and sales pipeline
 2. **Employee Management System – Phase 1 (Front-End)** – Implemented the first development phase of an Employee Management System, building the employee profile dashboard, task list, schedules, and notes interface using modern front-end best practices.
 3. **Interactive HTML Marketing Email** – Designed and coded a responsive, branded email template in HTML/CSS to promote Odecci's school website services, ensuring compatibility across major email clients and allowing staff to easily copy and paste the template directly into Gmail for campaigns.
 4. **Quotation Template** – Created a reusable quotation template in HTML and SCSS used to generate professional client quotes with itemized services, rates, and totals aligned to Odecci's branding.
- Striven Fitness Tracking with Visual Workouts and AI-Powered Food Recognition**
1. Developed a modern, responsive step-tracking PWA using React, Vite, and Tailwind CSS, delivering real-time metrics (steps, distance, calories, active time) with all data processed client-side for maximum privacy.
 2. Implemented offline support, device sensor integration (DeviceMotionEvent/Generic Sensor API), and installable cross-platform capability, ensuring barrier-free fitness tracking without app store or subscription requirements.
 3. Integrated a Visual Exercise Library powered by the ExerciseDB API to surface searchable workouts with images, muscles targeted, and equipment details.
 4. Delivered manual and AI-assisted nutrition logging, workout history, local foods database, and AI food scanner that analyzes captured meal images to estimate and store nutritional data.
