Detail-oriented recent graduate skilled in front-end and back-end web development, specializing in building responsive applications and integrating RESTful APIs, seeking to deliver innovative solutions as a Full-Stack Web Developer

Education		
STI College Balagtas		Balogtas, Bulacan
Bachelor of Science in Information Technology		June 27,2025
Thesis: Barangay Management Information System for Efficient and Effective Governance on Barangay Primero Borol 1st		
Awards: President's Dean Lister (2021-2023)		
Experience		
Organization: Odecci Solutions Inc.		Guiguinto, Bulacan
Position Title: Front-End Developer & Integration Engineer		January 2025 – May 2025
- Designed and implemented responsive UI/UX for a CRM system using Laravel and Blade, ensuring consistent usability across web and mobile platforms - Integrated APIs to enable seamless data communication between front-end and back-end systems - Collaborated with a 4-member development team throughout the full software development lifecycle, from coding to deployment - Conducted system testing, identifying and resolving issues to optimize performance prior to release		
Organization: Self-Employed		Remote Work
Position Title: Freelance Full Stack Developer		2024-Present
- Completed multiple web development projects involving front-end and back-end implementation using Laravel and MS SQL - Designed and developed responsive user interfaces with HTML, CSS, and JavaScript for academic-related applications - Developed back-end APIs and managed databases using Laravel framework and MS SQL for dynamic data handling - Coordinated project requirements and delivery timelines with university student clients, ensuring timely delivery of functional solutions - Built a local government information management system featuring secure admin controls, real-time data visualization, communication tools, and service transaction tracking (project details under NDA)		
Activities & Involvement		
Organization: Microsoft and LinkedIn		Remote
Title of Qualification Awarded: Career Essentials in Software Development		2025
Organization: Asean Foundation with Collaboration of AI Ready ASEAN and Google.org		Remote
Title of Qualification Awarded: Certificate of Completion – AI Learning Modules		2025
Organization: APAC Cybersecurity Fund – The Asia Foundation		Remote
Title of Qualification Awarded: Certificate of Completion – Cyber Hygiene Training		2025
Organization: STI COLLEGE BALAGTAS		School
Title of Qualification Awarded: Certificate of Completion – SAP BUSINESS ONE, SAP ADVANCE		2024
Organization: STI COLLEGE BALAGTAS		School
Title of Qualification Awarded: Mobile App Hackathon (1st Runner Up – UI/UX)		2024
Organization: iSite Inc.		Remote
Title of Qualification Awarded: National IT Skills Competition Participation – Python		2024
Organization: STI COLLEGE BALAGTAS		School
Title of Qualification Awarded: Codefest (1st Runner Up)		2024
Organization: STI COLLEGE BALAGTAS		School
Title of Qualification Awarded: CCDT Certified Programmer Level 2		2023

Skills & Interests

Technical:

- Front-End: HTML, CSS, JavaScript, React, Tailwind CSS, Bootstrap, Livewire, Sass/SCSS
- Back-End: PHP (Laravel), Java, C#, MySQL, MSSQL
- Integration: RESTful APIs, Twilio
- Tools: Git, CI/CD workflows
- Project Management: Agile (Scrum)

Design & Tools:

- Adobe Photoshop, Adobe Illustrator, Figma

Development Practices:

- Responsive UI/UX design
- Modular component architecture
- Cross-platform optimization

Highlighted Projects

TypoGuard Real-time weather, Live tides, and dam monitoring platform

1. Designed and launched a fully responsive web application using Laravel 11 and Tailwind CSS, delivering real-time, multi-source monitoring for weather, tides, and dam levels across the Philippines.
2. Engineered dynamic geolocation search and interactive UI/UX; automated live updates using exclusively open-source APIs (PAG-ASA, Tomorrow.io, WeatherAPI) for location-based forecast and tide data.
3. Built robust backend connectivity, smart search fallbacks, and scalable architecture supporting disaster preparedness and public safety on both desktop and mobile platforms.

Barangay Management Information System for Efficient and Effective Governance on Barangay Primero Borol 1st

1. Developed a local government information management system featuring secure administrator controls, comprehensive resident data management, real-time demographic and jurisdictional visualization, automated permits issuance, integrated SMS communication platform, transaction tracking, complaint monitoring, interactive mapping for disaster response, and robust audit logging; collaborated closely with local government staff to tailor practical solutions (project under NDA).

CRM System – Odecci Solutions Inc. (Internship Project)

1. Spearheaded the front-end development of a modular, responsive CRM system using TALL Stack.
2. Developed user-friendly dashboards, contact management, deal tracking, and dynamic forms supporting custom fields and secure admin workflows
3. Integrated third-party packages, implemented robust role-based access control (RBAC), and delivered secure authentication, data encryption, and audit logging features
4. Collaborated on CI/CD, version control (GitHub), and contributed to API endpoints for leads, sales pipeline, and analytics
5. Maintained detailed documentation and contributed to ongoing enhancements based on business and end-user feedback

Striven Fitness Tracking with Visual Workouts and AI-Powered Food Recognition (Ongoing Development)

1. Developed a modern, responsive step-tracking PWA using React, Vite, and Tailwind CSS, delivering real-time metrics (steps, distance, calories, active time) with all data processed client-side for maximum privacy.
2. Implemented offline support, device sensor integration (DeviceMotionEvent/Generic Sensor API), and installable cross-platform capability, ensuring barrier-free fitness tracking without app store or subscription requirements.
3. Currently expanding features include a visual exercise library, manual and AI-assisted nutrition logging, workout history, common foods database, and enhanced privacy via local data storage; planning future releases with native wrappers (Capacitor/Cordova), iOS/Android distribution, and optional cloud sync.
